EDUCATION

Vedica Institute of Technology, Bhopal

2016 – 2020

B.E. - Electrical and Electronics Engineering - CGPA - 6.9

Bhopal, Madhya Pradesh

Vedica Institute of Technology, Bhopal

2022 – 2024

MBA - Finance and Marketing - CGPA - 7.3

Bhopal, Madhya Pradesh

EXPERIENCE

Intern at VRSIIS Pvt. LTD. ↗

JUNE 2026...

Role - Python intern

Noida, UP

- * Learned and Implemented **Advanced Algorithms, YOLO, OCR, OPENCV, Fine tuning.**
- * Working on various projects using various coding methodologies.
- * Successfully cleared the **ATMS Advanced Software Test** during my internship.
- * Implemented ANPR Project to Recognise vehicle no. plate.
- * Handle the Database and created a responsive front-end using **HTML, CSS and JavaScript.**

Process Expert at Provana India Pvt Ltd ↗

March 2025 - April 2026

Role - Process Expert

Noida, UP

- Analyzed US customer case scenarios and prepared documents to support debt recovery operations.
- Maintained 97% quality scores in a high-volume process environment by analyzing customer documents and implementing corrective actions.

PROJECTS

RECOMMENDATION SYSTEM ↗ | Python, Scikit-Learn, SVM, LR, NLTK

Dec 2025

- Designed and deployed a hybrid recommendation engine utilizing content-based filtering algorithms.
- Engineered data pipelines for user search behavior analysis, optimizing prediction pipeline to achieve 94.7% accuracy.

FACE BASED ATTENDANCE SYSTEM. ↗ | FaceNet, OpenCV, TensorFlow, MySQL

Dec 2025

- Developed a computer vision pipeline utilizing FaceNet and OpenCV for real-time face detection.
- Optimized model inference latency to process live pictures across variable lighting conditions and angles.
- Automated real-time SQL database logging, reducing manual attendance tracking overhead by 90%.

FRAUD DETECTION ENGINE ↗ | Python, Random Forests, KNN, SKLearn, Docker

Jan 2026

- Architected a supervised machine learning pipeline using Random Forests and KNN to isolate fraudulent financial transactions.
- Executed advanced feature engineering, data preprocessing techniques to handle severe class imbalances.
- Evaluated performance using precision-recall curves, minimizing false negatives to maximize user transaction security.

SIMPLE AI CHAT BOT ↗ | Python, NLTK, TensorFlow, CI/CD

Feb 2026

- Preprocessed raw user text inputs utilizing advanced tokenization techniques to map custom queries to predefined intents.
- Developed an NLP-based chat bot to automate query resolution, reducing manual customer support interactions by 10%.

TECHNICAL SKILLS

Languages: Python, SQL, PostgreSQL, MySQL

AI / Machine Learning: NLP, PromPt Engineering, LangChain, LLM, RAG, AI Agents, Computer vision.

Technologies/Frameworks: MySQL, YOLO, NumPy, TLS, Django, HTML5, CSS3, Load Balancer, OpenCV

Developer Tools: Docker, FastAPI, AWS, CI/CD, Git, GitHub, PyCharm, Kubernetes, Redis, NGINX

CERTIFICATIONS

- Professional Training in Data Science, Artificial Intelligence, Python, and Machine Learning – APTRON

EXTRACURRICULAR

- 3rd Rank, Annual Chess Tournament: Competed and ranked 3rd out of 30 competitors at RKDF University.
